

# MOSQUITO

designed by Niko Kralj

## Light like the flight of a mosquito

Named after its wing-like seat, the Mosquito chair is a true eye-catcher. Following in the footsteps of Eames' moulded plywood experiments in the 1940s, the chair did not go into production when it was first created in 1953. Fortunately, thanks to the recent efforts of Rex Kralj to finally bring this exemplary chair to life, design enthusiasts can enjoy the patent-protected design today.
