

## AROMATIC AND SPECIAL WINES

Product Code: UL04300

The meticulous attention applied to the shapes in this collection, and the virtually maniacal search for lightness have endowed these excellent glasses with an exceptional quality.

The shapes have been studied for each wine while the common denominating factor of these ultralight glasses consists in the rim which provides a smoother approach to the liquid.

As such, white wine, red wine, important reds, aromatic and distilled wines, spumanti and champagne can all be enjoyed with the usual delight but with the added element of the surprising 'agility' of the glass which makes the tasting such a unique experience.

Probably the lightest glasses for tasting ever made, these have been designed by Federico de Majo who, once again, has shown his extraordinary passion and skill in searching to create something simply beautiful.

### FEATURES

capacity: ..... cl 43  
Maximum Height: ..... mm 230  
Maximum diameter: ..... mm 85  
Maximum weight: ..... gr 103
