

Solar, outdoor design Jean Marie Massaud 2011

FOSCARINI

Solar is a luminous hemisphere. Created out of polyethylene, the lamp is set on the ground and covered by a circular plane that screens the light and works concurrently as a resting surface.

Designed for indoors and out, Solar is in harmony with a broad-ranging concept of living, in which the garden can become a living area. Not just a lamp but a new type of object, a contemporary hearth around which to gather and chat, at home or outside.

In the indoor model, the resting surface is slightly concave, with its edges just slightly raised. The outdoor version instead has a straight resting surface that is flush with the outer edge, to allow the rain to just slip away. The surface finishes are also different: glossy white or dark wood for the indoor version, with a characteristic textured effect for the outdoor version. Decorative on its own or arranged in a composition of multiples, Solar has a retractable base that allows you to incline it

in order to change the lighting effect while remaining perfectly stable. A bright, warm and intimate center of attraction, Solar is ideal for scenic compositions, such as a large hall or in the garden, to create suggestive light paths.

Solar, outdoor technical info

FOSCARINI

Description

Floor lamp with diffused and direct down light. Rotational moulded polyethylene diffuser, porcelain stoneware top shelf, polyester powder coated zinc alloy die cast base. Adjustable light with an inclination up to an angle of 15° with respect to the supporting surface. Electrical cable covered in neoprene for outdoor use without switch on the cable, equipped with an IP 65 terminal board and for the countries envisaged with a second Schucko plug CEE 7/7 IP44.

Materials: polyethylene, gres and metal

Colours: brown

Brightness

diffused and direct down light

Weight

net kg: 11,70
gross kg: 15,80

Packing

vol.m³: 0,213
n.boxes: 2

Bulbs

– compact fluorescent 1x25W E27

Cable length

Certifications

□ CE V ENEC cULus LISTED IP 65 - IP44
